

GEARKOTE

DESCRIPTION

GEARKOTE is a highly viscous asphalt-based gear lubricant enhanced with extreme pressure (EP) additive.

PROPERTIES

- When applied, Gearkote leaves a thick film, which protects the lubricated surface from corrosion and rust
- Provides long lasting protection and minimizes lubrication costs due to its highly adhesive properties

TYPE

- Asphalt-based lubricant

APPLICATION

- Big open gears, wire ropes, large open chains and sprockets such as those found in mining and construction equipment and other types of machinery.

GRADES

ISO VG 3K and 22K

AVAILABLE PACKAGES

- 200-liter drums
- 18-liter pails

TYPICAL CHARACTERISTICS

	3K	22K
Specific Gravity at 15.6°C	0.9889	0.9966
Flash Point, COC, °C	230	228
Color, Visual	Black	Black
Viscosity at 40°C, cSt	3215	21411
