

Product Data Sheet

ZERFLO 68

DESCRIPTION

ZERFLO 68 is a high quality lubricant with very low pour point and natural oxidation resistance suitable for the lubrication of refrigeration equipment.

PROPERTIES

- Resistant to thermal breakdown and sludge formation
- Does not react chemically with refrigerants or with metals of the system
- Recommended for all types of ammonia and halogenated refrigeration equipment

TYPE

- Naphthenic Refrigeration Compressor Oil

APPLICATION

- Refrigeration and air-conditioning compressors

GRADE

- ISO VG 68

AVAILABLE PACKAGES

- 200-liter drums
- 18-liter pails

TYPICAL CHARACTERISTICS

Specific Gravity at 15.6 °C	0.8972
Flash Point, COC, °C	200
Color, ASTM	3.5
Viscosity at 40°C, cSt	66.90
Viscosity at 100°C, cSt	7.98
Pour Point, °C	-36
